Chris,

Here are some of the tables I was thinking of:

Student

--StudentId, FirstName, LastName,etc

Course

--CourseId,Name,Description,Prereq,CoReq,Credits

Teacher

--TeacherId,FirstName,LastName,etc

Class

--Classid, CourseId, StudentId,TeacherId,DeliveryMethod,Semester, Year,Grade

Program

--ProgramId, Description

StudentProgram

--StudentProgramId,ProgramId,StudentId,StartDate,EndDate

If you bring in your laptop we can try to make everything work. I was also thinking maybe you could create in it Access first.

Thanks,
Carrie
